

Technical Bulletin

July 14, 2008

Subject: Whirlpool HVAC Residential Package Gas Ignition Control Operation

Models: W2PG3, W4PG4

Please be advised of the following sequence of operation:

When power is applied to the unit with no call for heat or cool, and the gas valve is turned off, it goes directly into a 2 flash code and starts the inducer. When the gas valve is turned back on, it shuts the inducer off and goes back to the normal heart beat flash after the power is reset.

If you have any questions, please contact Tech Support at 866-305-9974 or Tradewinds at 904-407-4470.

Regards,

Larry Pittman
Director of Operations
