Subject: Whirlpool HVAC Products – Service Level Suffix and Parts Lookup

Models: All

Please be advised of the following.

When searching for component part numbers for any Whirlpool HVAC unit model, make sure to get the correct service level suffix number from the unit model and serial label. This suffix is the number and letter following the “-” after the unit model number.

Example: W2GC336A-1A      The “1” following the “-” is the service level suffix number.

The service level dictates the components that are used in that particular model and must be referenced to ensure the correct parts list is being used.

If you have any questions, please contact Tech Support at 866-305-9974 or Tradewinds at 904-407-4470.

Regards,

Larry Pittman  
Director of Operations
